GUILLERMO BARRAGAN

OVERVIEW

A dedicated, motivated, and hardworking individual. Interested in software development and working in both, back-end and front-end development. Ability to adapt to small or large groups working on any project scale. Strong work ethic and problem-solving skills.

EXPERIENCE

Landy Cleaning LLC, Lynnwood, WA — *Frontend Web Developer*

January 2018 & February 2019 - Present

Link: http://www.landycleaningservice.com

Assist a local business with any computer software issues regarding their website

- Added small amounts of custom CSS and HTML code to the WordPress theme
- Knowledge of mobile and computer query displays
- Developed a website for a local business using WordPress to update an old website design

WebKey, Seattle, WA — *Developer Intern*

July 2016 - August 2016 & December 2016 - January 2017

Collaborated on a small team coding both front-end and back-end features and edited existing features according to client specifications to deliver custom web solutions.

- Exposure to Sourcetree and git version controls
- Created and maintained code in HTML, CSS, Javascript, PHP, and SQL
- Tested overall consistency of the website and checked for any bugs
- Developed quarterly reports for administrators using PHP and SQL
- Worked on their green roads project. Link: https://www.greenroads.org

Personal Website — *Personal Project*

Link: http://www.guillermobarragan.com

Used frontend technology to complete the site. The project lasted a month to complete.

- Utilized HTML5, CSS, and Javascript for the frontend feature on the website
- Built the site using the Bootstrap 4 framework to account for mobile devices

Bill Calculator - *Personal Project*

Link: https://www.guillermobarragan.com/billCalc.html

A simple calculator to take the guesswork out of finding out how much tip to leave and how to split the bill

- Design a single web application using HTML, CSS, and Javascript
- Understanding of how Javascript works with both HTML and CSS

TOOLS

In addition to the languages mentioned above, I have experience using the following tools:

- Sublime
- Visual Studio Code
- WordPress
- Squarespace
- Git
- GitHub

EDUCATION

Missouri Valley College, Marshall, MO — *BS Computer Informations Systems*

August 2013 - December 2017

Course Highlights

- **Internet programming**: Collaborated with a small group in building a math placement test for the math department where my job was to design and build the front-end portion of the website
- **Database Management**: A course dedicated to teaching the basics as well as how to link and optimize simple and complex databases
- **Web Design**: Focused on design rather than development
